THE ORIGINAL IPHONE SUPERIMPOSED ON THE IPHONE X, PIXEL-FOR-PIXEL

David Barnard:

The entire home screen of the original iPhone (320 × 480 pixels) is about the size of 2 icons on the iPhone X home screen (1125 × 2436 pixels).

Linking to Barnard's tweet, Joshua J. Arnold nails it:

This is what a decade's worth of *sustaining innovation* looks like.

Qi Wireless Charging

How does it work?

- Base station sends out test signal
- Phone replies to signal, tells the base station the difference between full battery and current battery
- Base station adjusts power output to eliminate difference
- When full charge reach, base station returns to standby
- Positioning of the coils is really important
