

Mosyle Business

A brief review of the Mosyle Business MDM and Apple DEP

Preface

- I don't have much experience with other MDM's such as JAMF.
- I've been using Mosyle for a couple months now and haven't tried and tested all the features.

Advantages

- \$1 per month per device(if paid annually)
- Free Trial easy to start
- Great, Fast Support
- Support Built into the Interface
- Interface
- Works well with Apple VPP
- Easy to setup
- Support during free trial(Shocking)
- Ticket History kept in the web interface

CORNERSTONE

Disadvantages

- This is a new product and it shows
- No Easy way to add multiple devices of one kind to user.
- Status reporting isn't accurate
 - Bluetooth status
 - Passcodes on iPhones
- Name changes of computers don't push sometimes.
- Many features on iOS require supervision, which requires wiping the device and preparing it in Configurator.
- No way to resend invite email after initial user creation.
- No Way to resize columns in device view
- No ability to search for individual device in device view.

Device List

Last updated: 19 minutes ago

The sync process may take some time depending on the number of devices. Newly added devices, or recently purchased devices, may take a bit longer to appear.

Update

IMPORTANT! If you have recently re-assigned devices to the Mosyle MDM server from ABM/ASM that were associated with a DEP profile in Mosyle - before enrolling please be sure to click UPDATE to verify the DEP profile status syncs properly between Mosyle and the DEP servers.
