- **Subscribed Calendars**

Search Sections

General

Use this section to define general settings

Name
Display name of the profile.

[Required]

Identifier
A reverse-DNS style identifier (com.example.myprofile, for example) that identifies the profile. This string is used to determine whether a new profile should replace an existing one or should be added.

Mac.36E407B0-B291-4BA5-AD37-64D3DDD849FE

Organization
Name of the organization for the profile.

Payload Description
Explanation of the purpose of the configuration profile

☐ **Prevent users from removing this profile (supervised only)**
☐ **Has removal passcode**

Automatically Remove Profile
Settings for automatic profile removal

Never

Language ID
The IETF BCP 47 identifier for that language (for example, en or jp).

en

Demo

- Creating a simple profile
- Deep search
- Saving, validation, and default values
- Signing profiles
- Exporting payloads
- Rolling own manifest

ProfileManifests

- Open source project compiling and documenting all known preference properties for Apple platforms
- Powers iMazing Profile Editor and ProfileCreator
- Led by Mac sys admin experts on the MacAdmins slack
- DigiDNA is an active contributor

Get in touch

- MacAdmins Slack, in the **#imazing_profile_editor** channel or directly to me at **@AriLeviatan**
- Support requests can be submitted at **https://support.imazing.com/hc/en-us/requests/new**
- Pull requests for payload manifests at **https://github.com/ProfileCreator/ProfileManifests**
